

AP MSME One schemes — gap analysis and integration design

Source: live catalog at <https://apmsmeone.ap.gov.in/schemes> (31 entries in portal JS bundle) · App catalog: `client/src/lib/ventureMatch/schemes.ts` · Date: 18 Sep 2026 · **Rev 2 — official errata applied** (SCLCSS, PMEGP_2ND, Stand-Up caution, conditional questions)

Official execution contract (errata): Build against this checklist, not the original Rev 1 CLCSS proposal.

- **CLCSS rename:** Replace generic `CLCSS` with `SCLCSS` (SC/ST-owned MSEs only, 25% up to ₹25 Lakh). Route general-category tech upgrade to existing `AP_TECH_UPGRADE` (20% under AP MSME-EDP 4.0).
- **PMEGP_2ND:** Require `stage = brownfield` (or restart) + `upgradeIntent = secondPmegpLoan`; *hard-fail* on `greenfield`.
- **Non-DPR CTAs:** `CHAMPIONS`, `ESDP`, `ATI`, `NTCEC` — no 18-step P&L.
- **Cluster routing:** `MSECDP`, `SFURTI`, `APCDP`, `APICF` → `/cluster-dpr/create`.
- **Question gating:** Show `upgradeIntent`, `qualityGoal`, `sectorFlag`, `procurementInterest` only when prior answers unlock them.

Decision for Create New Latest DPR: do not add cluster / common-facility schemes to the individual scheme-card picker. Route those users to Cluster DPR. Integrate the remaining missing *unit-level* schemes into Scheme Finder scoring and into Create New Latest DPR overlays (full 18-step bank DPR, short overlay, or no-DPR redirect).

31

Schemes on AP MSME One

4

Cluster / CFC — skip individual DPR

27

Relevant to a single unit

9

Of those 27 already in the app

18

Missing from the app (to integrate)

7

In the app but not on this 31-list (keep)

1. How the 31 were counted

The public SPA at `/schemes` loads a `schemes` module. That module contains **exactly 31 scheme objects** with `id`, `name`, `shortName`, and `category`. Category `cluster` is used for CFC / industrial-estate / traditional-cluster programmes.

This document treats that 31 as the portal's official list. Confirm live GOs, ceilings, and agency names before locking a DPR.

2. Full portal catalog (31)

#	PORTAL ID	NAME	PORTAL CATEGORY	BUCKET	IN APP?
1	PMEGP	Prime Minister's Employment Generation Programme	credit	Individual	YES — PMEGP
2	2ndLoan (PMEGP)	2nd Loan for Up-gradation of Existing PMEGP / REGP / MUDRA Units	credit	Individual	MISSING
3	CGTMSE	Credit Guarantee Scheme for Micro & Small Enterprises	credit	Individual	YES — CGTMSE
4	PMMY	Pradhan Mantri Mudra Yojana	credit	Individual	YES — MUDRA
5	APCMEP	Andhra Pradesh Chief Minister's Entrepreneur Programme	credit	Individual	YES — AP_CMEP
6	SUPI	Stand Up India (DFS, MoF)	credit	Individual	YES — STANDUP
7	ECLGS	Emergency Credit Line Guarantee Scheme	credit	Individual	MISSING
8	PMVK	PM Vishwakarma	skills	Individual	YES — VISHWAKARMA
9	ESDP	Entrepreneurship and Skill Development Programme	skills	No bank DPR	MISSING
10	ATI	Assistance to Training Institutions	skills	Institution (not unit DPR)	MISSING
11	SCSTHUB	National SC/ST Hub	skills	Procurement pack	MISSING
12	MSECDP	Micro & Small Enterprises Cluster Development Programme	cluster	CLUSTER — SKIP	No (correct)
13	SFURTI	Scheme of Fund for Regeneration of Traditional Industries	cluster	CLUSTER — SKIP	No (correct)
14	APCDP	Andhra Pradesh Cluster Development Programme	cluster	CLUSTER — SKIP	No (correct)
15	APICF	Assistance to Pharmaceutical Industry for Common Facilities	cluster	CLUSTER — SKIP	No (correct)
16	ASPIRE	Promotion of Innovation, Rural Industries and Entrepreneurship	innovation	Individual (incubator)	MISSING
17	CHMPS	MSME Champions Scheme	technology	Routing / short form	MISSING
18	IPR	Innovative – Incubation, Design, IPR	technology	Short overlay	MISSING
19	LEAN	Competitive LEAN	technology	Short overlay	MISSING
20	ZED	Sustainable ZED Certification	technology	Short overlay	MISSING
21	CLCSS	Portal label: Credit Linked Capital Subsidy — implement as SCLCSS only (general CLCSS closed 31.03.2020)	technology	Individual (SC/ST upgrade DPR)	MISSING → SCLCSS

#	PORTAL ID	NAME	PORTAL CATEGORY	BUCKET	IN APP?
22	PTUAS	Pharmaceutical Technology Upgradation Assistance	technology	Individual (pharma)	MISSING
23	NTCEC	New Technology Centres and Extension Centres	technology	Service request	MISSING
24	MSEGIFT	MSE Green Investment and Financing for Transformation	sustainability	Individual (green capex)	MISSING
25	MSESPICE	MSE Scheme for Promotion & Investment in Circular Economy	sustainability	Individual	YES — MSE_SPICE
26	PMS	Procurement and Marketing Scheme	market	Short marketing annex	MISSING
27	MSMETEAM	Trade Enablement and Marketing Initiative (TEAM / ONDC)	market	Individual	YES — RAMP_TEAM
28	CVY	Coir Vikas Yojana	sectoral	Individual (coir extras)	MISSING
29	NHDP	National Handloom Development Programme	sectoral	Individual (handloom extras)	MISSING
30	PMPDS	Pharmaceutical & Medical Devices Promotion and Development	sectoral	Individual (pharma extras)	MISSING
31	PMFME	PM Formalisation of Micro Food Processing Enterprises	sectoral	Individual	YES — PMFME

3. Cluster schemes — 4, do not put on Create New Latest DPR cards

These are multi-unit / SPV / Common Facility Centre programmes. Create New Latest DPR is a **single-unit** report. Forcing a proprietor through CFC, shareholding, and cluster employment grids produces a document a scheme officer will reject.

PORTAL	WHY CLUSTER	WHERE IT BELONGS IN THIS APP
MSE-CDP MSECDP	GoI grant for CFCs (indicative up to ₹15–30 Cr) and industrial-estate infrastructure. Needs many units + SPV.	Cluster DPR <code>/cluster-dpr/create</code> . Optional Scheme Finder result: “Use Cluster DPR”, not individual cards.
SFURTI	Regeneration of traditional <i>industries as clusters</i> (CFC, raw-material bank, design). IA + SPV model.	Cluster DPR. Matcher: activity <code>craft</code> + many artisans → cluster CTA.
APCDP	State cluster development programme (same shape as MSE-CDP / SFURTI).	Cluster DPR. AP domicile boost. Do not overlay on individual 18 steps.
APICF	Pharma <i>common</i> facilities (testing, ETP, logistics) per cluster, not one factory’s plant.	Cluster DPR with pharma extras. Individual pharma units use PTUAS / PMPDS instead.

Product rule: the Create New Latest DPR picker must not list these four. If Scheme Finder ranks them, show a card that navigates to Cluster DPR with a short explanation (“this is a multi-unit / CFC scheme”).

4. Already in the app — 9 of 27 unit-level portal schemes

PORTAL ID	OUR CODE	SCHEME FINDER TODAY	CREATE NEW LATEST DPR OVERLAY TODAY
PMEGP	PMEGP	Greenfield micro unit; education / caste / rural subsidy rules.	18 steps. Step 18: quotes, building estimate, caste cert if SC/ST/BC. 8th-pass gate by cost.
CGTMSE	CGTMSE	Collateral-free guarantee; budget bands through ~₹10 Cr.	Default 18-step individual overlay (no extra fields in v1).
PMMY	MUDRA	Budget bands map Shishu / Kishore / Tarun / Tarun Plus.	Hide complex capex under ₹5L; Nayak WC; shop proof / statements / optional Mudra closure.
SUPI	STANDUP	SC/ST or woman + greenfield + verified ₹10L–₹1Cr band. Do not invent post-Mar-2025 ceilings until revamp guidelines are notified.	Default 18-step overlay; brief must say confirm with bank / DFS.
PMVK	VISHWAKARMA	Craft / artisan; not a factory term loan.	Drops steps 15–17. Step 1: craft + tools. Uploads: Aadhaar, passbook, ration card.
PMFME	PMFME	Food processing activity.	Step 1 FSSAI. Step 18: quotes, lease, draft FSSAI.
APCMEP	AP_CMEP	AP booster for manufacturing / knowledge.	Default 18-step + AP brief pack.
MSESPICE	MSE_SPICE	Circular / resource-efficient tech.	Default 18-step + brief.
MSMETEAM	RAMP_TEAM	ONDC / e-commerce market.	Default 18-step + brief.

In our matcher but not on this 31-list — keep (7)

These are still valid for Andhra Pradesh users. Do not delete them just because the current portal JS omits them.

OUR CODE	NAME	WHY KEEP
SVANIDHI	PM SVANidhi	Street vendors; CoV/LoR overlay already built.
AP_EDP	AP MSME-EDP 4.0	State industrial policy overlay (APIIC park, FCI, CFE/CFO).
AP_FPP	AP Food Processing Policy 4.0	State food-processing incentives beyond PMFME.
AP_TECH_UPGRADE	AP Technology Upgradation Subsidy	State 20% tech-upgrade for expansion under MSME-EDP 4.0 — primary path for general-category tech upgrade (not revived CLCSS).
OBMMS	AP welfare corporation self-employment loans	Caste / welfare-corp channel.
AP_PARKS	AP MSME-PARKS land rebate	Land/plot incentive, not a term loan.
EPM_NIRYAT	EPM Niryat Protsahan	Export promotion; complements TEAM/ONDC.

5. Current Scheme Finder questions (14) — baseline

File: `client/src/lib/ventureMatch/questions.ts`. Matching is client-side and deterministic.

#	ID	WHAT IT CAPTURES
1	activity	mfg, knowledge, food, craft, service, trade, vending, crop, mixed, notSure, notBusiness
2	stage	greenfield, brownfield, idea, restart, notSure
3	budget	under2L ... above10Cr, none, notSure
4	legal	sole, partnership, company, unregistered, otherEntity
5	owner	female, sc, st, bc, pwd, transgender, exServiceman (multi) vs exclusive generalMale / notSure
6	domicile	ap, other, planningAp
7	location	urban, rural, apiic, home, outsideAp
8	riceCard	AP rice / other card
9	age	under18 ... above60
10	education	below8th, 8thPlus
11	udyam	yes, willing, applied, refuse
12	priorSubsidy	none, repaid, outstanding
13	govtFamily	yes / no (PMEGP-style exclusion)
14	market	offline, ecommerce, export, both, notSellingYet

These 14 score credit schemes well. They **cannot** fairly rank ZED, LEAN, PMS, 2nd PMEGP loan, pharma, coir, or handloom without extra questions (section 7).

6. Current Create New Latest DPR overlay — baseline

Shared skeleton: steps 1–18. Overlay via `matchedSchemeCode` in `schemeFormConfig.ts`:

- **Hidden steps:** Vishwakarma and SVANidhi drop 15, 16, 17.
- **Step 1 extras:** craft/tools (Vishwakarma), CoV/UPI (SVANidhi), FSSAI (PMFME), APIIC park (AP EDP).
- **Step 12/15:** MUDRA Shishu–Kishore hides land/building; Nayak WC on step 15.
- **Step 18 uploads:** scheme-specific lists; default Aadhaar/PAN, Udyam, passbook, quotations.
- Most of the 9 mapped portal schemes other than PMEGP / MUDRA / Vishwakarma / PMFME still use the *generic* “no extra fields on 1–17” impact copy.

7. Shared questions to add once (conditional — not all at once)

Add a small number of Scheme Finder questions so the missing schemes can be scored without a 40-question wizard. **Strict gating** prevents questionnaire fatigue:

NEW QUESTION ID	WHEN SHOWN	OPTIONS (SUMMARY)	UNLOCKS
supportType	Always (after stage)	loanOrSubsidy, guarantee, certification, training, marketingFair, clusterCfc, notSure	Filters ESDP/ZED/LEAN/PMS vs bank DPR vs Cluster DPR.
upgradeIntent	Only if stage = brownfield or restart	expandSameLine, techUpgrade, secondPmegpLoan, workingCapitalOnly, notSure	2nd PMEGP, SCLCSS, ECLGS, PTUAS, AP tech upgrade.
qualityGoal	Only if supportType = certification	zed, lean, ipr, none, notSure	ZED, LEAN, IPR.
sectorFlag	Only if activity = mfg, craft, or food	none, pharma, coir, handloom, notSure	PTUAS, PMPDS, CVY, NHDP.
procurementInterest	Only if owner includes sc or st	yes, no, notSure	National SC/ST Hub vs ordinary credit.

Handoff to Create New Latest DPR must pass these new fields in ventureMatchAnswers so overlays and uploads can branch. Clear skipped answers when the user goes back and changes a gating answer.

8. Missing schemes — how Scheme Finder and Create New Latest DPR change

Each card below is the integration spec. Codes in backticks are proposed app codes.

8.1 Credit / loan overlays (keep full or near-full DPR)

2nd Loan (PMEGP) — proposed `PMEGP_2ND`

MISSING Portal: upgrade loan for existing PMEGP / REGP / MUDRA units (indicative subsidy on upgrade cost).

Scheme Finder

- Require `stage` = brownfield (or restart with prior unit).
- Require `upgradeIntent` = secondPmegpLoan.
- **Hard-fail** if `stage` = greenfield or idea (that is first PMEGP only).
- Prefer `priorSubsidy` = repaid (existing assisted unit fully repaid).
- Reuse PMEGP owner / education / rural location scoring; do not double-count as a new unit.

Create New Latest DPR

- Keep 18 steps but retitle copy: “upgrade of existing unit”, not “establishment of new unit”.
- Step 1 extras: previous scheme (PMEGP / REGP / MUDRA), previous sanction amount, year of first subsidy, Udyam of existing unit.
- Step 9–12: only incremental machinery / civil — not a greenfield land story.
- Step 18: prior sanction letter, subsidy claim / adjustment proof, CA certificate of existing investment, quotations for new P&M.
- Brief pack: separate from first PMEGP (eligibility is existing assisted unit).

ECLGS — proposed `ECLGS`

Emergency / additional working-capital guarantee for existing MSMEs. Not a greenfield project loan.

Scheme Finder

- Require existing unit: `stage` brownfield; `udyam` yes or applied.
- `upgradeIntent` = workingCapitalOnly (or `supportType` = guarantee).
- Fail idea / greenfield with no operations.

Create New Latest DPR

- Do not pretend this is a 18-step capex DPR. Use a **short WC pack**: unit identity, last 12 months turnover, existing limits, additional WC sought, repayment, bank statements.
- Hide or collapse steps 9–10, 16 (implementation Gantt) and cluster-style impact.
- Step 18: Udyam, GST returns / ITR, bank statements, existing sanction, CA turnover certificate.
- If product insists on one form: keep steps 1, 4, 11, 13, 14, 18 visible only.

SCLCSS (not general CLCSS) — proposed SCLCSS

Policy: General CLCSS / TUS closed permanently on **31 March 2020**. The only active central credit-linked capital subsidy for technology upgradation is **SCLCSS** — strictly for **SC/ST-owned MSEs**, indicative 25% capital subsidy up to ₹25 Lakh. Do *not* implement a generic CLCSS code.

General-category brownfield tech upgrade → existing state scheme **AP_TECH_UPGRADE** (20%).

Scheme Finder

- **stage** brownfield or restart; **upgradeIntent** = techUpgrade.
- **owner** includes **sc** or **st** (hard requirement).
- **activity** mfg / food / craft (not pure vending).
- Budget typically machinery-sized — fail **under2L** unless quotes exist.
- If owner is general / not SC-ST and wants tech upgrade → match **AP_TECH_UPGRADE** instead (when AP domicile rules pass).

Create New Latest DPR

- Full 18-step bank DPR is appropriate (term loan + capital subsidy).
- Step 1 extras: existing vs proposed technology, SC/ST ownership proof reminder.
- Step 12: plant & machinery dominant; land/building optional.
- Step 13: term loan + SCLCSS subsidy line + promoter margin.
- Step 18: caste certificate, machinery quotations with tech specs, existing Udyam, term-loan sanction (or in-principle), CA certificate of existing FCI.
- Share overlay patterns with existing **AP_TECH_UPGRADE** where possible.

8.2 Certification / quality — short overlay, not 18 bank steps

ZED — proposed ZED

Scheme Finder: **supportType** = certification or **qualityGoal** = zed; existing unit preferred; Udyam yes/willing.

Create New Latest DPR: do not run full bank DPR. Visible steps: 1 (unit), 4 (profile), 11 (applicant), plus a new compact block “ZED assessment” (current level, target Bronze/Silver/Gold, consultant, assessment fee). Step 18: Udyam, existing QMS if any. Generate a *certification assistance note*, not a term-loan DPR. CTA from matcher: “Prepare ZED pack” not “Generate bank DPR”.

LEAN — proposed LEAN

Scheme Finder: **qualityGoal** = lean; brownfield manufacturing / food.

Create New Latest DPR: short pack: process map, bottleneck, consultant, implementation cost. Hide 5-year P&L unless they also pick a credit scheme. Step 18: Udyam, shop-floor photos optional.

IPR (MSME Innovative) — proposed MSME_IPR

Scheme Finder: qualityGoal = ipr, or supportType = certification with innovation intent. Knowledge / mfg / food.

Create New Latest DPR: extras: IP type (patent / design / trademark / GI), filing stage, attorney cost. Hide capex tables. Step 18: draft specification or TM search, Udyam.

MSME Champions — proposed CHAMPIONS

Scheme Finder: low weight; supportType not loan. This is a helpdesk / delayed-payment / public-procurement facilitation channel.

Create New Latest DPR: no 18-step form. Result card: “Raise on Champions / contact DIC” plus optional 5-field complaint template. Do not add to scheme picker as a DPR overlay.

8.3 Skills / institutions — usually no DPR

ESDP — proposed ESDP

Scheme Finder: supportType = training; idea / greenfield welcome; age/education already captured.

Create New Latest DPR: skip. After match, CTA = “Register interest for ESDP batch” (name, district, trade). Optionally prefill Create New Latest DPR vanilla if they later want a bank DPR.

ATI — proposed ATI

Assistance is to *training institutions / EDIs*, not a citizen unit. **Do not** add to individual picker. Scheme Finder: hide unless a future “I represent an institution” path exists.

National SC/ST Hub — proposed SCST_HUB

Scheme Finder: owner includes sc or st; procurementInterest = yes; Udyam yes/willing.

Create New Latest DPR: procurement-readiness pack (not term loan): products, GeM/tender experience, capacity, quality certs. Step 18: caste certificate, Udyam, cancelled cheque. Keep 18-step bank DPR only if they also match PMEGP/MUDRA/Stand-Up.

NTCEC (Technology Centres) — proposed NTCEC

Scheme Finder: supportType = training or techUpgrade; mfg.

Create New Latest DPR: service request (tooling / training / job work), not a loan DPR. CTA: nearest MSME Technology Centre / extension centre.

8.4 Innovation / green

ASPIRE — proposed ASPIRE

Scheme Finder: rural location or agri-allied / livelihood; idea or greenfield; innovation / incubator intent. Fail large above10Cr factory budgets.

Create New Latest DPR: livelihood / incubation DPR: shorter financials (maybe hide 15–17 like Vishwakarma). Step 1 extras: livelihood activity, incubator name if any. Step 18: rural address proof, concept note.

MSE-GIFT — proposed MSE_GIFT

Scheme Finder: brownfield mfg/food; upgradeIntent = techUpgrade; optional “green machinery” chip.

Create New Latest DPR: same skeleton as SCLCSS / AP tech upgrade but extras: energy baseline (kWh), old vs new machine, expected saving. Step 18: energy bill, quotations for EE equipment, Udyam. Can sit beside MSE_SPICE .

8.5 Market and sector-specific

PMS (Procurement & Marketing Support) — proposed PMS

Scheme Finder: supportType = marketingFair; Udyam yes; existing unit preferred.

Create New Latest DPR: marketing annex: event name, city class, stall size, space-rent estimate — not plant DPR. Hide steps 12–17 or replace with a 4-field fair budget. Step 18: Udyam, previous fair photos optional. If they also need a term loan, keep a second CTA to vanilla/PMEGP DPR.

Coir Vikas Yojana — proposed CVY

Scheme Finder: sectorFlag = coir, or activity = craft/mfg + coir products. AP coastal districts boost later if needed.

Create New Latest DPR: 18-step bank/subsidy DPR. Step 1 extras: coir product line, Coir Board registration planned/yes. Step 18: Coir Board docs, quotations. Brief pack from Coir Board guidelines (confirm live).

NHDP (Handloom) — proposed NHDP

Scheme Finder: sectorFlag = handloom; activity = craft; may combine with Vishwakarma (different benefit — do not auto-merge).

Create New Latest DPR: extras: loom type, weaver ID / handloom corp membership, yarn. May drop heavy P&L like Vishwakarma if it is a weaver household, not a mill. Step 18: weaver ID, Aadhaar, passbook.

PTUAS — proposed **PTUAS**

Scheme Finder: sectorFlag = pharma; brownfield; techUpgrade.

Create New Latest DPR: 18-step upgrade DPR. Extras: WHO-GMP / Schedule M status, product licences. Step 18: manufacturing licence, pollution consent, quotations, CA FCI. Distinct from APICF (cluster common facilities).

PMPDS — proposed **PMPDS**

Scheme Finder: sectorFlag = pharma; can be promotion / bulk-drug park / medical devices — score separately from PTUAS.

Create New Latest DPR: extras: device vs formulation, CDSCO / SLA licences. Uploads: product licence, Udyam, quotations. Use full DPR if capex; short pack if only promotional support.

9. Matrix — 18 missing schemes at a glance

PROPOSED CODE	PORTAL	VM: EXTRA SIGNALS	DPR SHAPE	PICKER?
PMEGP_2ND	2nd Loan (PMEGP)	brownfield + secondPmegpLoan; fail greenfield	Full 18, upgrade copy + prior-subsidy docs	Yes
ECLGS	ECLGS	brownfield + WC only	Short WC pack (steps 1,4,11,13,14,18)	Yes (short)
SCLCSS	Portal CLCSS → SCLCSS only	SC/ST + brownfield + techUpgrade	Full 18, P&M-heavy + caste cert	Yes
ZED	ZED	certification / zed	Certification note	Yes (short)
LEAN	LEAN	certification / lean	Process-improvement pack	Yes (short)
MSME_IPR	IPR	ipr	IP filing pack	Yes (short)
CHAMPIONS	CHMPS	not loan	No DPR — helpdesk CTA	No
ESDP	ESDP	training	No DPR — batch interest	No
ATI	ATI	institution only	Out of scope (hide from citizen matcher)	No
SCST_HUB	SCSTHUB	sc/st + procurement	Procurement pack; bank DPR only if also credit-match	Optional
NTCEC	NTCEC	training / tooling	Service request	No
ASPIRE	ASPIRE	rural / incubator	Shorter livelihood DPR	Yes
MSE_GIFT	MSEGIFT	green techUpgrade	Full 18 + energy extras	Yes
PMS	PMS	marketingFair	Fair/stall annex	Yes (short)
CVY	CVY	sectorFlag coir	Full 18 + coir extras	Yes
NHDP	NHDP	sectorFlag handloom	Weaver overlay (may drop 15–17)	Yes
PTUAS	PTUAS	pharma + upgrade	Full 18 + pharma licences	Yes
PMPDS	PMPDS	pharma promotion	Full or short by capex	Yes

10. Recommended implementation order

- Guardrails:** keep 4 cluster schemes off the individual picker; add Cluster DPR CTAs in Scheme Finder for MSE-CDP / SFURTI / APCDP / APICF.
- Matcher questions:** add supportType always; gate upgradeIntent / qualityGoal / sectorFlag / procurementInterest (unblocks 2nd PMEGP, SCLCSS, ECLGS, ZED/LEAN filter).
- Highest-value DPR overlays:** PMEGP_2ND , SCLCSS (SC/ST only; general → AP_TECH_UPGRADE), MSE_GIFT .
- Short packs:** ZED, LEAN, PMS, ECLGS (stop sending these users through 18 empty bank steps).

- 5. **Sector extras:** CVY, NHDP, PTUAS / PMPDS.
- 6. **Non-DPR CTAs:** ESDP, Champions, NTCEC; hide ATI from citizen matcher.
- 7. For each new code: SchemeRule in `schemes.ts`, brief in `schemeBriefs/*`, extras/uploads/hidden steps in `schemeFormConfig.ts`, picker card (if DPR shape allows), and updates to both business-logic markdown files.

10a. Policy pitfalls (do not regress)

- Do not revive general CLCSS as an app code.
- Do not allow PMEGP_2ND on greenfield / idea stage.
- Do not quote unverified Stand-Up India ceilings after the original window ended (Mar 2025) until new guidelines are published.
- Do not force ZED / LEAN / IPR / PMS / ESDP / Champions / NTCEC through a full bank P&L.

11. Files that would change when integrating

FILE	CHANGE
client/src/lib/ventureMatch/types.ts	New answer fields and option unions.
client/src/lib/ventureMatch/questions.ts	Insert 2–5 questions; i18n EN/TE.
client/src/lib/ventureMatch/schemes.ts	New SchemeRule entries; cluster rules CTA to cluster flow.
client/src/lib/ventureMatch/evaluate.ts	Only if matching primitives change.
client/src/lib/individualDpr/schemeFormConfig.ts	extras, hidden steps, uploads, getSchemeImpact.
client/src/lib/individualDpr/schemeBriefs/*	Brochure EN/TE per new code.
client/src/lib/individualDpr/prefillFromVentureMatch.ts	Map new answers into steps.
client/src/components/individual-dpr/SchemePickerGrid.tsx	Cards appear automatically from SCHEME_OPTIONS; exclude cluster codes.
docs/venture-match-business-logic.md	Questions + scheme list.
docs/create-new-dpr-business-logic.md	Overlays, uploads, picker exclusions.

12. What this document is not

- Not a substitute for live scheme GOs. Ceilings on the portal (e.g. older PMEGP ₹25L/₹10L vs current KVIC ₹50L/₹20L) already diverge — briefs must say “confirm with DIC / agency”.
- Not an instruction to add all 18 as full 18-step bank DPRs. Training, certification, and fair-support schemes would harm users if forced through plant-and-machinery tables.
- Not a Cluster DPR redesign. MSE-CDP already matches the existing cluster form (SPV, CFC, member units).
